Arabic
Native

PROFILE

Frontend developer specialising in React and TypeScript, with a background in UI/UX design. I have built complete web applications on top of REST APIs: JWT authentication, protected routes, role-based dashboards, CRUD screens, charts, drag-and-drop boards and Stripe payments. I also customise Shopify and PrestaShop stores as a freelancer. Currently taking the Web Development Course at IT Academy (Barcelona Activa). Open to frontend roles in Barcelona or remote.

EXPERIENCE

Freelance Web Developer — Present
Self-employed · Barcelona

- Set up and customise e-commerce stores on Shopify and PrestaShop for small businesses.
- Fix frontend issues and improve page speed and usability on client websites.

Frontend Developer — Oct 2024 – May 2025
FITS Lab Dev · Remote

- Guided and supported a team of developers to deliver project goals.
- Built frontend features for e-commerce, car-rental and user-management applications.

Frontend Developer — May 2024 – Oct 2024
Upskilling Academy

- Built React + TypeScript apps on REST APIs: Book Shop, Food Recipes, Project Management System and User Management System.
- Implemented JWT authentication, protected routes, form validation and role-based dashboards.

UI/UX Designer — Feb 2024 – Oct 2024
Smart Developer for Programming & Design

- Designed interfaces for government-service and product platforms.

UI/UX Design Intern — Oct 2023 – Jan 2024
Route · Remote

- Ran user research and turned findings into wireframes, prototypes and high-fidelity mockups.
- Designed “Chill Away”, a travel app to find and compare packages, deals and hotels.

Internship Trainee — Apr 2022 – Oct 2022
Kal-Bunyan Al-Marsous

- Frontend training focused on JavaScript and CSS.

Designer and Developer
Jul 2019 – Aug 2021

Gorgov Digital Advertising Agency

- Web development and graphic design (Adobe Photoshop) for agency clients.

Frontend Developer
Aug 2018 – Nov 2018

Tech Village Egypt

- Built website layouts with HTML, CSS and Bootstrap.

SELECTED PROJECTS

StayCation · Hotel Booking
Team project

React, TypeScript, Material UI, Stripe

Two-sided booking platform: guests search rooms, save favourites and pay with Stripe; admins manage rooms, ads, users and bookings from a dashboard with charts. booking-iota-one.vercel.app

Project Management System

React, TypeScript, dnd-kit, AG Charts

Role-based app: managers create projects and assign tasks, employees move tasks on a drag-and-drop board. Full auth flow, charts and dark mode. project-management-system-y5bw.vercel.app

Book Shop

React, TypeScript, Redux Toolkit, Stripe

Online bookstore with catalogue, book details, Redux Toolkit cart and Stripe checkout.

Food Recipes

React, React Bootstrap, JWT

Recipe dashboard: admins manage recipes, categories and users; users browse and save favourites.
