Professional Summary

Frontend Developer specializing in React and TypeScript, with a background in UI/UX design. Built complete web applications on REST APIs, including JWT authentication, protected routes, role-based admin dashboards, CRUD interfaces, data charts, drag-and-drop boards and Stripe payment integration. Freelance experience customizing Shopify and PrestaShop e-commerce stores. Currently completing a React frontend specialization at IT Academy (Barcelona Activa). Open to frontend roles in Barcelona or remote.

Skills

- **Languages and frameworks:** JavaScript (ES6+), TypeScript, React, Redux Toolkit, Next.js, HTML5, CSS3, Sass
- **UI libraries and styling:** Material UI, Tailwind CSS, Bootstrap, React Bootstrap, responsive design
- **Libraries:** React Hook Form, Axios, dnd-kit, AG Charts, Stripe
- **APIs and authentication:** REST APIs, JWT authentication, protected routes, role-based access control, Postman, Swagger
- **Tools:** Git, GitHub, Vite, npm, Vercel
- **Design:** Figma, UI/UX design, wireframing, prototyping, user research, Adobe Photoshop, Canva
- **CMS and e-commerce:** Shopify, PrestaShop, WordPress

Work Experience

Freelance Web Developer | Self-employed, Barcelona, Spain

- Set up and customize e-commerce stores on Shopify and PrestaShop for small businesses.
- Fix frontend issues and improve page speed and usability on client websites.

Frontend Developer | FITS Lab Dev | Oct 2024 – Present

- Guided and supported a team of developers to deliver project goals.
- Built frontend features for e-commerce, car-rental and user-management web applications.

Frontend Developer | Upskilling Academy | May 2024 – Present

- Built React and TypeScript applications on production-style REST APIs: Book Shop, Food Recipes, Project Management System and User Management System.
- Implemented JWT authentication, protected routes, form validation and role-based dashboards.

UI/UX Designer | Smart Developer Company | Feb 2024 – Present

- Designed user interfaces for government-service and product platforms.

UI/UX Design Intern | Route | Oct 2023 – Jan 2024

- Conducted user research and turned findings into wireframes, prototypes and high-fidelity mockups.
- Designed Chill Away, a travel app for finding and comparing travel packages, deals and hotels.

Projects

StayCation, Hotel Booking Platform (team project) | React, TypeScript, Material UI, Stripe, React Hook Form, Axios

- Two-sided booking platform: guests search rooms, save favourites and pay with Stripe; admins manage rooms, facilities, ads, users and bookings from a dashboard with charts. Live demo: booking-iota-one.vercel.app

Project Management System | React, TypeScript, React Bootstrap, dnd-kit, AG Charts, React Hook Form

- Role-based app where managers create projects and assign tasks, and employees move tasks on a drag-and-drop board. Full authentication flow (register, verify, reset password), dashboard charts and dark mode.

Book Shop | React, TypeScript, Redux Toolkit, Material UI, Stripe

- Online bookstore with catalogue, book details, Redux Toolkit cart and Stripe checkout.

Food Recipes | React, React Bootstrap, React Hook Form, Axios, JWT

- Recipe management dashboard: admins manage recipes, categories and users; users browse recipes and save favourites. JWT authentication and protected routes.

User Management System | React, TypeScript, React Bootstrap, React Hook Form

- Admin dashboard to log in, list, view, add and edit users, with a profile page and validated forms.
